

- Our subject matter experts develop courses based off proven, academic research.
- Since courses are 10 minutes or less, employees have more time to apply what they've learn. They have more time to refresh, if needed. It allows for a more versatile training experience overall.
- Content targets the real needs of a company and its employees.
- Our presenters bring even more life to a course, sharing information in a way that demands your employee's attention.

Off the shelf, or off the beaten path.

Fa
you

No better... or know better.

eLearning isn't new. Companies have been providing it for years. From better ways to onboard new employees to boosting employee performance, there are many benefits to eLearning:

- Boosts productivity by up to 50%
- Cost effective: for every \$1 spent, a company receives nearly \$30 worth of productivity
- Time efficient: eLearning cuts down instruction time by up to 60%
- Improves performance levels
- And more...

Yet, most companies just offer “typical” solutions; either boring slideshow presentations, or nearly hour-long, drawn-out videos with no real focus. Lose the audience and you lose the knowledge, which means you've lost out on developing a more productive employee.

With ej4, we use the J4® approach to make videos that resonate better with employees.

JUST AS NEEDED

Practical learning that changes behaviors immediately.

JUST ENOUGH

Courses are 10 minutes or less. We can't stress the importance of that enough. Keep the message short and to the point for higher retention rates.

JUST IN TIME

Time to issue required compliance training? Whether it's for a staff of 50 or 5,000, our courses are there when you need it most.

JUST RIGHT

Our proven, straightforward design methodology entertains and engages at the perfect level.
